

Dynamic Player Interaction

Flexible scenes you can change on the fly with customer level customization capabilities.

Eye-Popping Animation

Bring any object to life through animation. You specify how each component of a scene behaves to give your customers a rich visual experience.

Downloadable Rewards

Manage multiple player accounts and schedule group-level promotions. Download earned points and marketing points and even upload them back to the customer's savings account so they can be used at different machines.

Player Tracking

Personalize the interface. Reward your best players with special gifts and tempt them with special offers with in-play popups.

Animate Anything

Control Everything

Avanti gives you pixel-level control to the millisecond over easing, size, position, speed, and much more for every element of every animation — even embedded videos.

Your Brand, Your Way

Your casino is themed, so why not theme your player tracking system? Avanti allows you to design your own interactive animations for every location and event.
